

Class 2 Homework - Heads, Shoulders, Knees and Toes

Homework is due in every fortnight. All children should complete the literacy and numeracy tasks and then they may choose from the remaining subjects what else they would like to do. However, children are most welcome to do more than what is set if they wish. Please bring completed homework to school on the following Monday mornings: 17th September, 1st & 15th October.

Please read with your child daily at home, little & often is best and practise the weekly spelling sentence.

1. Literacy

Practise writing your name starting letters from the line or trying joined handwriting. Please find example of names and practice sheet attached.

2. Numeracy

Year 1s - Practise counting backwards from 20 down to 0.

Year 2s - Practise counting backwards from 24 to 0 in steps of 2.

When you're confident be ready to show the class and we will count down with you.

3. Design & Technology

Help make your favourite healthy dinner or snack at home. Take a photograph of your meal and label it to show which types of food are on your plate. Can you say how each element helps to keep your body healthy?

4. Science

Pick an animal and draw a picture of it. You could choose from fish, amphibians, birds or mammals. Label the basic body parts of your animal and prepare to tell the class about the features that are similar and different to a human body.
